Allowable Subject Matter

1. Claims 1-24 are allowed.

2. The following is an examiner's statement of reasons for allowance:

None of the cited references in combination with other limitations of claim teaches or suggests a method of displaying an image that is reducing a bit-depth of the first and the second sub-frames differently based on different quantization equations in a first set of quantization equations, thereby generating a first dithered sub-frame and a second dithered sub-frame, as disclosed in independent claims 1 and 24. The closest art (Gibbon et al. and Chao et al.) disclose related methods, either singularly or in combination fail to anticipate or suggest these limitations obvious.

None of the cited references in combination with other limitations of claim teaches or suggests a system for displaying an image that is an image processing unit configured to define first and second sub-frames corresponding to the first set of image data, and generate corresponding first and second dithered sub-frames by quantizing pixel values of the first sub-frame using a first set of dither values, and quantizing pixel values of the second sub-frame using a second set of dither values, as disclosed in claims 16 and 22. The closest art (Gibbon et al. and Chao et al.) disclose related methods, either singularly or in combination fail to anticipate or suggest these limitations obvious.

Art Unit: 2629

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
